Course Description and its Learning Objectives

This is an introductory level course, aimed at students with no background knowledge in accounting and finance. The course starts with a general motivation behind studying accounting. It gradually builds on concepts and accounting principles to enable students to record entries and process them through the accounting cycle. The ultimate objective is to produce a set of financial statements and analyze them for decision making. In addition, the course also introduces the basic concepts from finance to enable students understanding viable investment decisions. Specifically, upon completion students should be able to:

- Understand the need for doing accounting from the users' perspective.
- Understand all the steps in the accounting cycle and the accounting principles.
- Prepare the financial statements and understand their role in making better and efficient decisions.
- Understand the basic finance concepts and evaluate financial viability of a business or project.

Evaluation Criteria

- | | |
|-----------------------------|--------|
| • Mid-term examinations (2) | 30-40% |
| • Final examination | 50-55% |
| • Quizzes and assignment | 10-20% |
